2025-11-02	20:00	Clobetasol Ointment	Apply thin layer	topical	7 days	For severe itching and inflammation

Diet & Recovery Plan

Date	Feeding Time	Food Type	Quantity	Notes
2025-11-02	08:00	Hypoallergenic kibble	100 g	Supports skin health
2025-11-02	14:00	Boiled salmon	75 g	Rich in omega-3 for skin repair
2025-11-02	20:00	Boiled pumpkin	50 g	Anti-inflammatory and digestible

Owner-Friendly Explanation

Mange is a skin condition caused by mites, requiring antiparasitic treatment and topical ointments to reduce inflammation and prevent infection. A diet rich in omega-3 supports skin recovery.
