

# Veterinary Prescription

**Pet Name:** Tinku  
**Pet Number:** PET-1761453518812-606  
**Disease:** Mange

## Prescription Schedule

Date	Time	Medicine	Dosage	Route	Duration	Notes
2025-10-26	08:00	Ivermectin	0.2-0.4 mg/kg	oral	14 days	Administer under veterinary supervision; avoid in certain breeds
2025-10-26	14:00	Mupirocin Ointment	Apply thin layer	topical	10 days	Apply to affected areas after cleaning
2025-10-26	20:00	Clobetasol Ointment	Apply thin layer	topical	7 days	For severe itching and inflammation

## Diet & Recovery Plan

Date	Feeding Time	Food Type	Quantity	Notes
2025-10-26	08:00	Hypoallergenic kibble	100 g	Supports skin health
2025-10-26	14:00	Boiled salmon	75 g	Rich in omega-3 for skin repair
2025-10-26	20:00	Boiled pumpkin	50 g	Anti-inflammatory and digestible

## Owner-Friendly Explanation

Mange is a skin condition caused by mites, requiring antiparasitic treatment and topical ointments to reduce inflammation and prevent infection. A diet rich in omega-3 supports skin recovery.
