

Veterinary Prescription

Pet Name: Unnamed
Pet Number: PET-1762357034401-100
Disease: Lumpy skin disease

Prescription Schedule

Date	Time	Medicine	Dosage	Route	Duration	Notes
2025-11-05	08:00	Cefpodoxime proxetil	5 mg/kg	oral	14 days	Broad-spectrum antibiotic to combat secondary bacterial infections common with skin lesions. Administer with food to enhance absorption. Monitor for gastrointestinal upset. AI-generated; immediate vet consultation required.
2025-11-05	14:00	Prednisolone	0.5 mg/kg	oral	7 days	Corticosteroid to reduce inflammation and pruritus associated with skin lesions. Taper dose gradually after 7 days to avoid adrenal insufficiency. Monitor for increased thirst/urination. Contraindicated in dogs with diabetes. AI-generated; immediate vet consultation required.
2025-11-05	Daily	Mupirocin 2% ointment	Apply thin layer	topical	14 days	Topical antibiotic ointment to treat localized bacterial infections within skin lesions. Apply twice daily after cleaning the affected area with a mild antiseptic. Monitor for any signs of local irritation. AI-generated; immediate vet consultation required.
2025-11-05	Daily	Hydrocortisone 1% cream	Apply thin layer	topical	7 days	Topical corticosteroid cream to reduce inflammation and itching in localized skin lesions. Apply sparingly to affected areas twice daily. Do not use on deep or infected wounds without concurrent antibiotic treatment. AI-generated; immediate vet consultation required.

Diet & Recovery Plan

Date	Feeding Time	Food Type	Quantity	Notes
2025-11-05	morning	Hypoallergenic Diet	Adjust per label for weight	Hypoallergenic diet to minimize potential allergic reactions that may exacerbate skin conditions. Use a novel protein or hydrolyzed protein formula. Monitor for improved skin condition. AI-generated; immediate vet consultation required.
2025-11-05	evening	Omega-3 Fatty Acid Supplement	Dosage per label (EPA/DHA)	Omega-3 fatty acid supplementation (EPA/DHA) to support skin health and reduce inflammation. Administer with food. Monitor for gastrointestinal upset. AI-generated; immediate vet consultation required.
2025-11-05	midday			

Date	Feeding Time	Food Type	Quantity	Notes
		Limited Ingredient Diet	Adjust per label for weight	Limited Ingredient Diet to further help with a possible allergic component that might exacerbate skin issues. Helps to pinpoint a possible source of irritation. AI-generated; immediate vet consultation required.
2025-11-05	Daily	Probiotic Supplement	Dosage per label	Probiotic supplement to promote gut health and support immune function, potentially aiding in skin health. Administer with food. Monitor stool consistency. AI-generated; immediate vet consultation required.

Owner-Friendly Explanation

This treatment plan includes antibiotics to combat secondary infections, corticosteroids to reduce inflammation, topical treatments for localized lesions, and a tailored diet to support skin health. This is an AI-generated plan and requires immediate veterinary consultation to confirm diagnosis and adjust treatment based on clinical findings. Lumpy skin disease in dogs can be serious, and prompt veterinary care is essential.
