2025-11-07	Daily	Lime Sulfur Dip	As directed on label (typically 4oz/gallon of water)	topical	Weekly	Apply topically once weekly for 4-6 weeks, or as directed by veterinarian. Protect eyes during application. Do not rinse off after application. Monitor for skin irritation. AI-generated; immediate vet consultation required.
2025-11-07	Daily	Terbinafine	30 mg/kg	oral	21 days	Administer orally once daily for 3 weeks. Monitor for gastrointestinal upset. Use with caution in patients with liver disease. AI-generated; immediate vet consultation required.

Diet & Recovery Plan

Date	Feeding Time	Food Type	Quantity	Notes
2025-11-07	morning	High-quality commercial dog food	Based on manufacturer's guidelines for weight and activity level	Maintain a balanced diet to support immune function and skin health. Ensure adequate protein intake to aid in tissue repair. AI-generated; immediate vet consultation required.
2025-11-07	midday	Omega-3 fatty acid supplement	As directed on label (e.g., fish oil capsules)	Supplement with omega-3 fatty acids to promote healthy skin and coat. Consult with veterinarian for appropriate dosage. AI-generated; immediate vet consultation required.
2025-11-07	evening	High-quality commercial dog food	Based on manufacturer's guidelines for weight and activity level	Divide daily food ration into two meals to improve digestion. Ensure fresh water is always available. AI-generated; immediate vet consultation required.
2025-11-07	Daily	Vitamin E Supplement	400 IU	Supplement with Vitamin E to support skin health and immune function. This is particularly important in cases of dermatophytosis to help with skin

Date	Feeding Time	Food Type	Quantity	Notes
				recovery. AI-generated; immediate vet consultation required.

Owner-Friendly Explanation

Ringworm treatment involves antifungals to eradicate the infection, topicals to reduce spread, and supportive diet to improve skin health. Untreated ringworm can spread to humans and other animals. This AI-generated plan requires immediate vet consultation due to potential drug interactions and the need for definitive diagnosis via fungal culture/PCR.
