

Veterinary Prescription

Pet Name: Unnamed
Pet Number: PET-1762354542223-664
Disease: Lumpy skin disease

Prescription Schedule

Date	Time	Medicine	Dosage	Route	Duration	Notes
2025-11-05	08:00	Supportive Fluids (Electrolyte Solution)	50-100 ml/kg	oral/IV	Until hydrated	Prevent dehydration; vet monitor
2025-11-05	14:00	Multivitamin Injection	5-10 ml IM	injectable	7 days	Boost immunity; cow/dog-specific
2025-11-05	20:00	Probiotic Supplement	1 dose oral	oral	10 days	Support gut health and recovery
2025-11-05	Daily	Pain Relief (NSAID if needed)	As per vet (e.g., 1.1 mg/kg)	oral/injectable	3-5 days	For fever/pain; only if symptoms present

Diet & Recovery Plan

Date	Feeding Time	Food Type	Quantity	Notes
2025-11-05	08:00	High-Fiber Hay/Soft Feed	5-7 kg (cow) or 100g (dog)	Easily digestible base; adjust for animal
2025-11-05	14:00	Nutrient-Rich Broth/Pellets	3-4 kg (cow) or 75g (dog)	Energy boost; add electrolytes
2025-11-05	20:00	Protein Supplement (Pellets/Lean Meat)	1-2 kg (cow) or 50g (dog)	Recovery support; probiotic-mixed
2025-11-05	Daily	Clean Water + Minerals	Ad lib	Essential for hydration; monitor intake

Owner-Friendly Explanation

No specific antiviral cure available—focus on supportive care, hydration, nutrition, and preventing complications. Tailor to animal type (e.g., ruminant diet for cows). Isolate pet, use fly/insect control if vector-borne. Monitor daily (temp, appetite)—consult vet immediately for hands-on treatment. This is AI-generated guidance only.
