2025-10-25	14:00	Rice water	50 ml	To maintain hydration
2025-10-25	20:00	Prescription recovery diet	As per vet	Gradually reintroduce solid food

Owner-Friendly Explanation

Parvovirus is a severe viral infection requiring aggressive fluid therapy and anti-nausea medication. A bland, easily digestible diet supports recovery. Consult a veterinarian immediately.
