

# Veterinary Prescription

Pet Name: Unnamed  
Pet Number: PET-1762359592422-107  
Disease: Listeriosis

## Prescription Schedule

Date	Time	Medicine	Dosage	Route	Duration	Notes
2025-11-05	08:00	Enrofloxacin	15 mg/kg	oral	7 days	Administer orally once daily for 7 days. Enrofloxacin is a broad-spectrum antibiotic used to combat Listeria infection. Monitor for any signs of gastrointestinal upset. AI-generated; immediate vet consultation required.
2025-11-05	14:00	Amoxicillin/Clavulanate	25 mg/kg	oral	7 days	Administer orally twice daily for 7 days. Amoxicillin/Clavulanate is used for its synergistic antibacterial effect. Ensure adequate hydration. AI-generated; immediate vet consultation required.
2025-11-05	20:00	Flubendazole	30 mg/kg	oral	5 days	Administer orally once daily for 5 days. Flubendazole aids in managing any concurrent parasitic infections, common in birds with compromised immune systems. Monitor for regurgitation. AI-generated; immediate vet consultation required.
2025-11-05	08:00	Meloxicam	0.2 mg/kg	oral	5 days	Administer orally once daily for 5 days. Meloxicam helps manage inflammation and pain associated with Listeriosis. Use with caution, monitor renal function, and ensure adequate hydration. AI-generated; immediate vet consultation required.

## Diet & Recovery Plan

Date	Feeding Time	Food Type	Quantity	Notes
2025-11-05	morning	Kaytee Exact Rainbow Bird Food	30 g	Provide a high-quality, easily digestible pelleted diet like Kaytee Exact. Soaking the pellets in water can aid ingestion due to difficulty eating. AI-generated; immediate vet consultation required.
2025-11-05	midday	NutriBird A21 Handfeeding Formula	20 ml	Supplement with a hand-feeding formula like NutriBird A21 to ensure adequate nutrition. Administer via syringe if the bird is unable to eat on its own. Warm to body temperature before feeding. AI-generated; immediate vet consultation required.
2025-11-05	evening	Cooked sweet potato	10 g	Offer small amounts of cooked and pureed sweet potato as a source of easily digestible carbohydrates and vitamins. Ensure it is unseasoned. AI-generated; immediate vet consultation required.
2025-11-05	Daily		50 ml	

Date	Feeding Time	Food Type	Quantity	Notes
		Electrolyte solution		Provide an electrolyte solution such as Lectade to combat dehydration. Offer fresh solution daily. Important for supportive care. AI-generated; immediate vet consultation required.

## Owner-Friendly Explanation

This treatment plan combines antibiotic therapy to target the Listeria bacteria with anti-inflammatory medication for pain management and nutritional support to aid recovery. Listeriosis is a serious infection and can quickly become fatal without prompt veterinary intervention. AI-generated; immediate vet consultation required.
